PROFILE

Mobile app engineer with 4+ years of experience shipping production iOS and Android products. Led the delivery of 10+ cross-platform applications using Flutter, React Native, Expo, and Ionic, with hands-on ownership of architecture, state management, real-time features, push notifications, deep linking, OTA updates, analytics, and backend integration. Combines polished mobile UX with reliable APIs, cloud delivery, and measurable performance improvements.

EXPERIENCE

Senior Mobile Developer

Aug 2024 - Sep 2025

Qemer Software Technology PLC | Addis Ababa, Ethiopia (On-site)

- Led development and launch of 10+ Flutter and Ionic applications across consumer and business use cases, accelerating release cycles by 40%.
- Established reusable app architecture and state-management patterns using BLoC, GetX, and layered feature modules.
- Improved startup, navigation, and data-loading performance, cutting application load times by up to 50%.
- Mentored junior mobile engineers and standardized delivery practices, reducing onboarding time by 30%.

Senior Software Engineer

Jul 2025 - Present

Hire Armada | United States (Remote)

- Build Flutter product experiences backed by Node.js, FastAPI, Prisma, Firebase, and real-time services.
- Delivered a social discovery platform supporting 10K+ daily active users with real-time matching, messaging, and 99.9% backend uptime.
- Shipped a personalized affirmation app with Gemini chat, home-screen widgets, notifications, and adaptive feeds, increasing retention by 35%.
- Partner with product and backend teams to take mobile features from ambiguous requirements through release, telemetry, and iteration.

Senior Full-Stack Developer

Jan 2025 - May 2026

Startup Agile | United States (Remote)

- Led React Native and Expo delivery across mobile products while completing milestones 15% ahead of schedule.
- Implemented OTA updates, deep linking, Firebase push notifications, Google Maps, AI assistants, and product analytics.
- Reduced mobile load time by 35% through bundle optimization, lazy loading, and disciplined client-side data fetching.
- Standardized TypeScript, state management, and Detox testing workflows, contributing to a 65% reduction in production defects.

AI Engineer

Jan 2025 - Aug 2025

DataCore Software | United States (Remote, Contract)

- Built low-latency FastAPI services for detection, transcription, summarization, and translation that could be consumed by web and mobile clients.
- Deployed containerized workloads to AWS EKS with sub-200 ms inference and 99.9% uptime at peak load.

EARLIER EXPERIENCE

- ERP Functional Consultant

Red Cloud ICT Solutions | Addis Ababa, Ethiopia

Mar 2023 - Sep 2024

- Progressed from Junior Consultant to Functional Consultant Assistant, supporting ERP discovery, configuration, testing, user enablement, and implementation delivery.
- Freelance Web Developer

Independent | Remote

Aug 2022 - Mar 2023

- Designed, built, and delivered responsive web solutions directly with clients from requirements through launch.
