PROFILE

Mobile app engineer with 4+ years of experience shipping production iOS and Android products. Led the delivery of 10+ applications using Flutter, React Native, Expo, Ionic, and native Swift and Kotlin integrations, with hands-on ownership of architecture, state management, real-time features, push notifications, deep linking, OTA updates, analytics, and backend integration. Combines polished mobile UX with reliable APIs, cloud delivery, and measurable performance improvements.

EXPERIENCE

Senior Software Engineer

Jul 2025 - Present

Hire Armada | United States (Remote, Full-time)

- Build Flutter product experiences backed by Node.js, FastAPI, Prisma, Firebase, and real-time services.
- Delivered a social discovery platform supporting 10K+ daily active users with real-time matching, messaging, and 99.9% backend uptime.
- Shipped a personalized affirmation app with Gemini chat, home-screen widgets, notifications, and adaptive feeds, increasing retention by 35%.
- Partner with product and backend teams to take mobile features from ambiguous requirements through release, telemetry, and iteration.

Senior Full-Stack Developer

Jan 2025 - May 2026

Startup Agile | United States (Remote, Full-time)

- Led React Native and Expo delivery across mobile products while completing milestones 15% ahead of schedule.
- Implemented OTA updates, deep linking, Firebase push notifications, Google Maps, AI assistants, Mixpanel analytics, and Sentry error tracking.
- Reduced mobile load time by 35% through React Native profiling, bundle optimization, lazy loading, and disciplined client-side data fetching.
- Enforced PR-gated TypeScript and Detox checks, and automated signed TestFlight and Play Store releases through CodeMagic with both EAS and non-EAS workflows, contributing to a 65% reduction in production defects.

Senior Mobile Developer

Aug 2024 - Sep 2025

Qemer Software Technology PLC | Addis Ababa, Ethiopia (On-site, Full-time)

- Led development and launch of 10+ Flutter and Ionic applications across consumer and business use cases, accelerating release cycles by 40%.
- Delivered native Swift features for the HolyChat and You Are iOS apps, and built Kotlin plugins plus Flutter platform-channel integrations for payment and DRM SDKs on Android.
- Established reusable app architecture and state-management patterns using BLoC, GetX, and layered feature modules.
- Used Flutter DevTools, Android Logcat, and Xcode profiling to diagnose startup, navigation, and data-loading bottlenecks, cutting application load times by up to 50%.

AI Engineer

Jan 2025 - Aug 2025

DataCore Software | United States (Remote, Part-time Contract, 20 hrs/week)

- Built low-latency FastAPI services for detection, transcription, summarization, and translation that could be consumed by web and mobile clients.
- Automated containerized AWS EKS infrastructure with Terraform and Ansible, sustaining sub-200 ms inference and 99.9% uptime at peak load.

EARLIER EXPERIENCE

ERP Functional Consultant

Mar 2023 - Sep 2024

Red Cloud ICT Solutions | Addis Ababa, Ethiopia

- Progressed from Junior Consultant to Functional Consultant Assistant, supporting ERP discovery, configuration, testing, user enablement, and implementation delivery.

Freelance Web Developer

Aug 2022 - Mar 2023

Independent | Remote

- Designed, built, and delivered responsive web solutions directly with clients from requirements through launch.

SELECTED INDEPENDENT DELIVERY

Mood Ride - Production Ride-Hailing Platform [[iOS Passenger](#) | [Android Passenger](#) | [Android Driver](#)]: Built and shipped passenger and driver apps for iOS and Android, reaching 6K+ combined Google Play downloads with NFC boarding verification, resilient background tracking, and real-time ride coordination.

Moteregna - Real-Time Courier Platform [[iOS User](#) | [Android User](#) | [Android Driver](#)]: Shipped user and driver apps for iOS and Android, reaching 11K+ combined Google Play downloads with automated courier matching, live tracking, Socket.io updates, wallet features, and payment integrations.

Mindflix - Affirmations, Goals & Habit App [[iOS](#)]: Built and shipped a Flutter and Riverpod iOS app combining personalized affirmations, goal and task management, reminders, and an Express.js API.

Africkiko - Open-Source Flutter Music App [[Source](#)]: Published an MIT-licensed Flutter codebase demonstrating Stacked MVVM, offline Hive storage, audio services, Firebase messaging, and native iOS and Android targets.
